

OHIO GREEN SCHOOLS RALLY

Green Schools = Thriving Children + Economic Development

Ohio leads the nation with approximately 300 LEED certified or registered school projects. The purpose of the inaugural Ohio Green Schools Rally is to bring together building professionals, school administrators and community leaders seeking to advance Ohio's green school movement and seize the opportunities that it presents. Green schools help children thrive in high-performance learning environments, and green schools mean jobs and economic development for Ohio's construction industry.

The Ohio Green Schools Rally will clarify "green schools" and explore how students, school districts and communities benefit from green schools. Learn from stakeholders and experts about the demand and strategies for high-performance schools. Be Informed by construction industry professionals, school administrators, and concerned citizens about green schools' role in transforming Ohio's built environment to be more healthy, sustainable and prosperous. GBCI CE credits pending for the event.
